

Pozývame Vás na

SEMINÁR ÚI SAV,

ktorý sa bude konať v piatok 22. 10. 2021 o 10.00 hod. online

pripojiť sa bude možno pomocou linku : <https://meet.google.com/obr-qmka-ahj>

Program:

Asad Saghari (Irán - štipendista NŠP na ÚI SAV v oddelení I. Budinskej)

Reducing the time and complexity in the early stages of product design processes through utilizing Knowledge Discovery in Databases (KDD)

Abstract:

In this presentation, first, the life cycle and design process of complex products and their challenges will be introduced, and then the capabilities of Knowledge Discovery in Databases (KDD) in solving these challenges will be discussed. Finally, some implemented examples of the use of KDD in the design process of a complex product will be presented.

In this presentation you will get familiar with:

- The life cycle of a product.
- The challenges of the design process of a complex product.
- Finally, you will learn about the hidden capabilities in previous product data to improve the complex products design process and reducing its time and complexity.

Ing. Mgr. Robert Andok, PhD.
